

TRUEVUE

R O A D L O C K

SMART LOCKING TECHNOLOGY

Secures your phone while driving to
reduce distraction.

MAGNETIC REMOVEABLE BATTERY

Easily charge at home or in-car with a flexible
detachable battery module.

Your Drive, Redefined.

EMERGENCY QUICK RELEASE

Access your phone when truly needed with a
built-in E-Stop button.

ROADLOCK

CHARGING

The RoadLock uses a removable battery that can be charged in the car or taken out and charged at home. Its magnetic design keeps it simple and compatible with all phones. Smart charging also stops when the phone is full or overheating.

E-STOP

The E-Stop button instantly disables the lock so the driver can manually slide the panel open in an emergency. Using it may cancel streaks or rewards, though verified emergencies can restore eligibility through the app.

CASE

A sliding polycarbonate panel lets drivers see directions without directly using their phone. Electromagnets lock the panel in place, creating a compact, app-controlled system that can automatically lock while driving.

MOUNT

The RoadLock mounts to the windshield with VHB tape and a static sticker. This keeps it secure while helping prevent sticky residue.

SMALL FAN

Built-in fans cool the phone and battery to prevent overheating and reduce condensation inside the RoadLock.

REDEFINE YOUR DRIVE

HOW DOES OUR TRUEVUE ROADLOCK WORK?

- Secure your phone in the RoadLock box – instantly transforms your phone from a distraction to a safety feature
- RoadLock restricts access to your phone, keeping you focused
- It also turns your phone into a high-quality dashcam, protecting you in case of an accident
- RoadLock also stores dashcam footage, keeping your phone free

DRIVING SMART, DRIVING SAFE

TrueVue RoadLock redefines the way we use our phones behind the wheel. By turning your phone into a dashcam, it minimizes distractions while enhancing safety. Drivers gain confidence on the road, and families gain peace of mind — every time you drive.
